Document Title: Cold Email Infrastructure Setup Secondary Domain & Warm-Up Blueprint
Category: Cold Email Infrastructure Setup | Status: Sanitized technical sample (Rev. 0 Set
---
Summary: Sanitized multi-domain sending architecture showing primary domain isolation, mailbox d

[Page 1] Multi-Domain Outbound Architecture & Warm-Up Schedule (SWA-INFRA-ARC-02)
Infrastructure Layer | Configuration Standard | Volume / Threshold | Verification
---
* Primary Root Domain Strict DMARC p=reject Zero cold outbound traffic permitted
  [0 cold sends / day (Isolated)] -> Reputation Shielded (Protected)
* Secondary Sending Domains 301 HTTPS redirect to primary + full SPF, DKIM 2048-bit & DMARC
  [2 mailboxes per domain] -> MX & Auth Verified (Active)
* Days 01 14 Warm-Up Ramp Gradual daily increment (+2 sends/day) with 30% conversational repli
  [10 30 emails / day / box] -> 0% Hard Bounce Gate (Ramping)
* Campaign Readiness Audit Plain-text ratio check, RFC 8058 List-Unsubscribe header, blacklist
  [Max 35 45 sends / day / box] -> Pre-Launch Cleared (Ready)
Note: Sanitized public demonstration sample Rev. 0 Configures technical readiness; never cla
