Document Title: Confined Space Entry & Gas Testing Risk Assessment
Category: Risk Assessment | Status: Public-source demo sample (Rev. 0 For review only)

Summary: Activity-based 5 5 Risk Assessment for vessel/manhole entry, LOTO isolation, continuous

[Page 1] Confined Space Entry Risk Assessment & Atmospheric Hold Points (SWA-HSE-CSE-022)
Entry Activity | Atmospheric / Physical Hazard | Init Risk | Controls & Hold Point
---
* 01. Mechanical & Process Isolation Inadvertent inflow of toxic gas, steam, or liquid
  [25 (Crit)] -> Positive spade/blinding + LOTO padlock register [HOLD POINT] (Res: 4 (Low))
* 02. Pre-Entry 4-Gas Testing Oxygen depletion / flammable vapor pocket
  [20 (High)] -> Stratified top/mid/bottom probe test by Authorized Gas Tester (Res: 4 (Low))
* 03. Forced Air Ventilation & Entry Heat stress / toxic fume accumulation during work
  [15 (High)] -> Continuous blower air changes + personal 4-gas monitor on entrant (Res: 3 (Low)
* 04. Standby Attendant & Rescue Unassisted entrant incapacitation inside chamber
  [16 (High)] -> Dedicated hole-watch log + certified tripod winch & SCBA on standby (Res: 3 (Lo
Note: Public-source demo sample Rev. 0 For review only. Missing site values flagged [HOLD PO
